

WARD MANUFACTURING

P.O. Box 9
117 Gulick Street
Blossburg, PA 16912-0009

(570) 638-2131

To: Whom It May Concern.

Ward Manufacturing is very proud of the efforts undertaken to be an “ecofriendly” producer of malleable iron pipe fittings and unions, gray (cast) iron pipe fittings, and corrugated stainless steel gas piping and fittings. Ward Manufacturing, with manufacturing facilities in Blossburg, PA and Lawrenceville, PA, is an ISO 14001 registered company.

In the manufacturing of pipe fittings approximately 92% of the base materials come from recycled materials. This material comes from two sources, scrap materials such as plate and structural steel and returns from the molding process (gates and runners). The suppliers for scrap material are located in Pennsylvania and the material comes predominantly from Pennsylvania. The stainless steel used in our WARDFLEX product also comes from recycled sources.
