

Viking Fabrication Services

High-quality pipe fabrication nationwide

Streamlined Pipe
Fabrication and
Delivery

Industry-leading pipe fabrication

Viking is committed to being the single and best source for all things related to fire protection for contractors everywhere, because we believe that protecting people and property from fire transcends the bottom line. The best solution is a complete solution, and that's why Viking SupplyNet combines full-service fabrication with the industry's most comprehensive range of fire protection products.

Pipe is an extremely critical link in the fire protection chain, so Viking began offering fabrication services to provide customers with everything they could ever need. Our complete turnkey fabrication services include threading, grooving, welding, and any necessary end preparation for black or galvanized import and domestic pipe. We consistently provide Viking's characteristic precision, innovation and exacting quality in every product we create.

Viking understands what a critical role industry training and advanced technology plays in ensuring the highest quality possible. That's why our welder training and certification program, preventative maintenance program, fabrication training program and the equipment we use reflects or exceeds industry standards, and results in unrivaled fabrication quality for our customers.

Streamlined process makes things simple

Viking's fabrication services simplify the entire pipe fabrication and installation process, making it simple and easy for you to get started on your next job. We offer an in-house process that cuts down on time and streamlines production for seamless and timely service for our customers.

We respect your busy schedule, and that is why Viking ensures accurate, on-time delivery without delays with our in-house delivery process and. Our delivery trucks are equipped with integrated forklifts for easy unloading at even the most difficult job sites, and Viking fabricated pipe is clearly and systematically marked and bundled for simple installation. Complete stock listing and estimating services are also available, offering a level of convenience that you can only find at Viking.

Integrated processes help you get the job done

Viking provides everything for the installation of complete fire protection systems, including fire sprinklers, valves, fittings, hangers and more.

Viking offers fabrication services at 15 Viking SupplyNet locations nationwide. We are constantly expanding our footprint and customers can expect our fabrication service locations to grow in the coming years. For an always-up-to-date list of our fabrication locations, please visit our website.
