

Build and price a
complete system riser

Valve & System Configurator

Viking's innovative Valve & System Configurator is the easiest way to build and price your system riser.

Breeze through the process of configuring your complete system riser with the Valve & System Configurator! Explore valve and trim options to find the right system for your application. You can dynamically render a 3D model by simply selecting system types, appropriate valve and trim options, add-ons and more. Then, quickly submit the complete list of materials to your local Viking SupplyNet to receive a quote.
